

National Professional Development Center on Inclusion

OSEP Project Directors Meeting

Washington, DC

July 16, 2007

Working with States to Support High Quality Professional Development for Preschool Inclusion

Presenters:

Pam Winton – Virginia Buysse – Shelley deFosset
FPG Child Development Institute
University of North Carolina
www.fpg.unc.edu/~npdci

Learner Outcomes:

- Learn about the research on preschool inclusion and professional development (PD)
- Understand the need for continued and improved efforts on professional development related to inclusion
- Learn about the National Professional Development Center on Inclusion's upcoming work with states to support high quality personnel for preschool inclusion

Agenda:

I. Inclusion and Professional Development: Looking at the Data

- Inclusion takes many forms; a single definition of inclusion does not exist (Odom, Schwartz, & ECRII Investigators, 2002).
- Almost 50% of young children with disabilities are being served in inclusive settings or natural environments (U.S. Department of Education, 2005)
- Children in inclusive settings do at least as well as children in specialized settings. Inclusion can benefit children with and without disabilities, particularly in the area of social development (Buysse & Bailey, 1993; Buysse, Goldman, & Skinner, 2002; Cole, Mills, Dale, & Jenkins, 1991; Guralnick,

Conner, Hammond, Gottman, & Kinnish, 1996; Odom & Diamond, 1998; Odom et al., 2004).

- A variety of factors influence the acceptance and implementation of inclusion (Bailey, McWilliam, Buysse, & Wesley, 1998; Buysse & Bailey, 1994; Buysse, Wesley, & Keyes, 1996; Cross, Traub, Hutter-Pishgahi, & Shelton, 2004; Lieber et al., 2000; Odom, Wolery, Lieber, & Horn, 2002; Scruggs & Mastropieri, 1996)
- Specialized instruction is an important component of inclusion and a moderator of child outcomes (Anita, Kreimeyer, & Eldridge, 1994; D'Allura, 2002; DeKlyen & Odom, 1989; Lefebvre & Strain, 1989; McEvoy et al., 1988; Odom et al., 2004; Schwartz, Carta, & Grant, 1996).
- Collaboration among parents, teachers and specialists is a cornerstone of high quality inclusion (Hunt et al., 2004; Odom, Schwartz, et al., 2002)
- Families of children with disabilities generally view inclusion favorably, although some families are concerned about quality of programs and services (Bailey & Winton, 1987; Bailey & Winton, 1989; Green & Stoneman, 1989; Lamorey & Bricker, 1993; Miller et al., 1992; Odom et al., 2004; Peck, Carlson, & Helmstetter, 1992; Reichart et al., 1989).
- For inclusion to be an effective preschool option, high quality is necessary but not sufficient for children with disabilities to succeed (Odom, Schwartz, et al., 2002)
- Personnel in early care and education settings lack confidence and competence in serving young children with disabilities (Buysse, Wesley, Keyes, & Bailey, 1996; Wesley, Buysse, & Skinner, 2001)
- Early childhood teacher preparation programs do not adequately prepare teachers to work with children with special needs (Chang, Early, & Winton, 2005; Early & Winton, 2001)

II. Establishing the Need for Professional Development Related to Inclusion

The lead story in the Wall Street Journal published on June 25, 2007, ("Mainstreaming" Trends Test Classroom Goals) discusses major problems with "mainstreaming." Using examples from one community's experiences, the reporter describes many problems across the nation including:

- Teachers are alienated and leaving the field because of inclusion; they do not have training and support to be successful
- Behavior of children with disabilities is distracting the rest of the class
- Children without disabilities are not getting the attention they need because of demands on teachers from children with disabilities
- There are not enough specialists to assist in the regular classrooms
- Parents of children with and without disabilities are against inclusion with a few exceptions
- The American Federation of Teachers does not support inclusion
- School districts aren't mainstreaming but "main-dumping" ...packing classrooms with disabled children without adequate support.

Discussion Questions:

- Do data support these conclusions?
- What are the implications of the concerns expressed in the article for the field?

III. National Professional Development Center on Inclusion (NPDCI): Goal and Definition and Conceptual Framework for PD

- **NPDCI Working Definition of Professional Development:** Professional development is defined as structured teaching and learning experiences that are formalized and designed to support the acquisition of professional knowledge, skills and dispositions as well as the application of this knowledge in practice (NPDCI, 2007).
- Conceptual Framework for Cross-Agency Professional Development System

IV. Actions You Can Take to Move from “What Is” to “What Can Be” (see Activity Sheet)

V. Resources for working with state planning teams

VI. Closing and Evaluation
